

# THE HUB® SOFTWARE RELEASE NOTES

Build No. v8.5.0

## Overview

This release of The Hub® software features custom fields and user security support for The Hub Connect OPC UA Server.

## New Features

### The Hub Connect Custom Fields Support

The Hub Connect users can now access Custom Fields information.

### The Hub Connect User Security Support

The Hub Connect now features user security, including encrypted connections using certificates and username/password support.

## Bug Fixes

### Unable to Upload CoPilot Update File (UPD) to The Hub®

When a user attempted to upload a CoPilot system UPD file to The Hub software, the file would not upload.
