

## Lynx Piezoelectric Adapter with Mold ID Capability

The Lynx Four and Eight Channel Piezo Adapters provides piezoelectric cavity pressure sensor users with a convenient, simple interface to four and eight channel piezoelectric systems. This device will identify the mold when used with RJG's Piezoelectric Connector with Mold ID Capability. Multiple devices can be daisy chained for molds with multiple connectors to utilize the eDART™ System's mold identifying and job startup features.

### Features:

- Interfaces directly with Fischer four and eight sensor systems
- Conditions the four or eight signals
- Sends data to the eDART System™
- Mold ID Capability
