

Overview

This release of the Sensor PreCheck (formerly Sensor eValuator) software features new zero offset testing ranges for the RJG, Inc. multi-channel strain gage 6 mm (MCSG-B-60-50/250) sensors.

New Features

The Sensor eValuator™ has been re-branded to the “Sensor Precheck”.

The Sensor PreCheck now includes new zero offset testing ranges for the RJG, Inc. multi-channel strain gage (MCSG) 6 mm sensors (MCSG-B-60-50/250): a warning at or above 15% (previously at or above 10%) and an alert at or above 20%.
